

PROFILE SUMMARY

Results-driven Data Engineer with over 5.5 years of experience specializing in the architecture and deployment of large-scale cloud data platforms using AWS and Snowflake. Proven track record in leading the delivery of high-volume data pipelines (1M+ records/day) that power marketing and product analytics. Expert in **Snowflake RBAC, cost-performance optimization, and dbt-based transformations**. Adept at translating complex business requirements into scalable data products, with extensive experience in **CDP enablement (Braze)** and technical leadership. Committed to driving data reliability, governance, and platform scalability to influence technical direction and business growth.

SKILLS

Data Engineering - ETL/ELT, Data Modeling, Data Quality, Pipeline Orchestration, Tasks, Streams, dbt, Dimensional Modeling
Cloud - Snowflake, Snowpark, AWS (S3, IAM, Redshift, Lambda), Databricks
Programming & Data - Python, Pandas, NumPy, Snowpark, SQL, Performance Tuning, Data Warehousing
Analytics & BI - Power BI, Looker Studio, Snowsight
Dev & Collaboration - Git, GitHub, JIRA, Agile

EXPERIENCE

MASSIVE ROCKET INDIA, Pune, MH - *Senior Data Engineer* - July 2024–Present

- Architected and led **5+ projects** on Snowflake, supporting **API, batch, and event-driven ingestion** with **Incremental data load**.
- Designed **analytics-ready dimensional and domain-based data models**, enabling downstream BI and CRM activation with **30–50% query performance gains** in compliance with **GDPR and CCPA** laws.
- Built and productionized **Python (Snowpark) + SQL pipelines** with idempotency, monitoring, and failure recovery, improving platform reliability and **reducing reprocessing effort by ~40%**.
- Implemented **dbt-based transformation layers (20+ models)** with modular design, testing, and documentation, accelerating analytics delivery across teams, enabling **Data Lineage tracking** and governance frameworks.
- Drove **warehouse cost optimization initiatives** (query refactoring, schema design, workload isolation), **reducing Snowflake compute spend by ~40%**.
- Acted as **data lead**, owning work allocation, code reviews, and mentoring, increasing team throughput and code quality.
- Partnered with product, marketing, and client stakeholders to translate ambiguous business goals into **scalable data architectures and metrics definitions**.
- Delivered **CDP-ready data layers** powering **Braze** for customer segmentation, lifecycle campaigns, and activation use cases across marketing and product domains.
- Built **10+ executive-facing dashboards** (Snowsight, Looker Studio) used for KPI tracking and operational decision-making.
- Developed **SQL-based transformations** using Databricks SQL for analytics and reporting use cases.

CAPGEMINI INDIA, Pune, MH - *Associate Consultant* - November 2020–July 2024

- Designed and optimized Snowflake **fact and dimension models**, improving analytics query performance by 30–40%.
- Leveraged **SnowSQL and Snowflake Time Travel** for validation, rollback, and recovery, reducing data downtime by 30%+.
- Delivered **Tableau and Power BI dashboards** consumed by business and leadership teams
- Supported **Agile** delivery across multiple projects and stakeholders to consistently meet tight SLAs.
- Developed **Python (Pandas, NumPy) scripts** to perform automated data analysis and segmentation on large lending datasets.
- Authored technical documentation for data schemas, **ETL mappings**, and SOPs, enabling seamless knowledge transfers within global teams.

PROJECTS

- **Omnichannel Customer 360 & Activation Engine** – Architected a Star Schema-based Snowflake warehouse to unify fragmented API data into a single "Golden Record" for 700K+ users. Engineered a Python Reverse ETL pipeline to sync refined segments into Braze, automating real-time customer activation
Tools: Snowflake (Star Schema), dbt, Python, REST APIs, Braze.
- **Data Transformation & Reporting for Hospitality Martech** - Automated **cross-client revenue and engagement reporting** by integrating **Snowflake with REST APIs**, saving **~1,000 manual working hours** and ensuring consistent, standardized metrics. Delivered **executive-facing dashboards** with optimized SQL transformations, improving reporting accuracy and decision-making speed.
Tools: Snowflake, SQL, Python, Looker Studio, Braze REST API

EDUCATION

- **B.Tech (Information Technology)** *Jun '16–Jul '20*
Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore, MP

CERTIFICATIONS

- **AWS Certified Data Engineer - Associate** - By Amazon Web Services (*March '26*)
- **SnowPro Core Certificate** - By Snowflake (*September '25*)
- **Braze Certified Technical Architect** - By Braze (*April '25*)
- **Braze Certified Developer** - By Braze (*November '24*)
- **Data Analysis with Python** - by IBM Developer Skills Network (*May '23*)

ACHIEVEMENTS

- **RISING STAR AWARD** - Received Rising Star Award in Q1 in the Year 2021 (*Capgemini*)
- **STAR OF THE MONTH** - Received Star of the Month Award for performance in Q4 - 2022 (*Capgemini*)
- **HERO OF THE MONTH** - Received Hero of the Month Award for performance in Q4 - 2025 (*Massive Rocket*)
